

**REMARKS**

The present paper is presented accompanying a U.S. National Phase Application under 35 U.S.C. §371 of PCT Application No. PCT/GB2005/000225. The aforementioned PCT application was filed January 21, 2005, claiming benefit of priority of Great Britain Patent Application No. 0401525.1, which was filed January 23, 2004, and U.S. Patent Application No. 60/560,336, which was filed April 6, 2004.

The present paper presents an amendment to the specification in order to perfect the priority claim of the instant application and to provide an Abstract in compliance with the requirements of the format of a U.S. application. In addition, the above amendment to the claims also is presented in order to place the claims in conformance with U.S. practice by removing improper multiple dependencies.

The Examiner is invited to contact the undersigned at the telephone number listed below if there are any questions with respect to this submission.
